MANAGING DIRECTOR'S COMMENTARY ON FINANCIAL RESULTS

UNAUDITED RESULTS FOR THE 1ST QUARTER 2022

Economic And Business Environment

The Jamaican economy grew by 6.7% during the fourth quarter of 2021 when compared to the same quarter of 2020. This was the result of increases in both the Services and Goods Producing Industries of 9.0% and 0.5%, respectively. This outcome should be considered against the 8.3% decline in value added in the fourth quarter of 2020, which largely resulted from the impact of the measures adopted to contain the spread of the novel Coronavirus (COVID-19). The performance of the economy in the review period was positively impacted by the relaxation of some COVID-19 measures including the easing of global travel restrictions and reduced curfews hours. Additionally, total value added grew by 1.4% when compared to the third quarter of 2021. This was the sixth consecutive quarter of growth since a 15.6% decline in the second quarter of 2020.

The inflation rate for February 2022 was 0.8%, primarily attributable to the 1.3% increase in the index of the heavily weighted 'Food and Non-Alcoholic Beverage' division. The increase in the division 'Food and Non-Alcoholic Beverages' was mainly attributed to the 2.2 per cent increase in the index for the class 'Meat and other parts of slaughtered land animals' due to increased prices for chicken products. As of February 2022, the point-to-point inflation rate was 10.7%, while the fiscal year-to-date inflation rate was 10.1%.

The exchange rate since the start of 2022 devalued by 0.72% or J\$1.12 to J\$157.13 as at February 28, 2022, while the movement year on year reflects a devaluation of 4.29% from J\$150.66 as of February 28, 2021. For the period January to March 2022, the JSE Main Market Index reflected a decline of 4,923.65 points or 1.24% from 396,155.61 to 391,231.96 points. However, when compared to March 2021 on a year-on-year basis, the March 2022 units fell by 3,427.59 or 0.87%. The JSE Junior Market reported an opposite

trend, as it ended March 2022 at 4,223.33 points compared to 2,982.96 points for March 2021. Year on year, it rose by 1.240.37 points, a 41.58% increase. Jamaica's stock market rebounded in 2021 and continues on the same upward trajectory in 2022 which represents a significant improvement over the same period in 2020. This was based on the recovery in the Jamaican economy and the normalization of business activity, which portended well for corporate earnings and improved investor sentiment.

On January 5, 2018, the Company changed its name from Mayberry West Indies Limited to Mayberry Jamaican Equities Limited under the International Business Companies Act, Cap 12.14.

The Company is an investment company whose objective is to achieve long term capital appreciation, while preserving capital, by investing in and trading public equity securities in Jamaica ("Jamaican equities").

2. Basis of preparation

These interim condensed financial statements (interim financial statements) have been prepared in accordance with IAS 34 Interim Financial Reporting. These interim financial statements should be read in conjunction with the Company's last annual financial statements as at and for the year ended December 31, 2021 ('last financial statements') which have been prepared in accordance with International Financial Reporting Standards (IFRS) and the Jamaican Companies Act. These financial statements are presented in Jamaican dollars unless otherwise indicated. This report is supplemental to the United States dollar Interim Report and is intended to provide additional information in the local currency of the listed stock to enhance analysis by users.

3. Significant accounting policies

The accounting policies applied in these interim financial statements are the same as those applied in the Company's financial statements as at and for the year ended December 31, 2021 which was prepared in accordance with International Financial Reporting Standards (IFRS).

Notes to the Interim Financial Statements

As at March 31, 2022

During 2021, the company made accounting policy changes which were effected in the 2021 audited financial results. The material changes include the reclassification of four portfolio investments to investments in associates based on the material proportion of ordinary shares held in in the entities as well as the assessment that the companies though not controlled by MJE, may be subject to significant influence by it.

The company also elected the IAS 28 exemption from applying the equity method of accounting to measure its investments in associates and instead to measure them at fair value through profit and loss (FVTPL) in accordance with IFRS 9. This had the effect of reclassifying one of these associates which was previously measured at fair value through other comprehensive income (FVTOCI) to FVTPL, and the unrealized losses and gains for this investment in prior years being reclassified to the profit and loss account from fair value reserves in equity.

The interim financial results for 2021 have been restated to conform with the current year presentation of the financial results. Please refer to notes 2, 3 and 24 to the audited financial statements for the year ended December 31, 2021 for further details on the changes to the company's accounting policies and financial statement restatements.

4. Segment reporting

The Board of directors considers the Company to have a single operating segment. The Board of Directors' asset allocation decisions are based on a single, integrated investment strategy and the Company's performance is evaluated on an overall basis which is as per the primary financial statements of the Company.

Notes to the Interim Financial Statements

As at March 31, 2022

5. COVID-19 Impact

The World Health Organisation (WHO) declared the novel coronavirus, COVID-19 to be a global pandemic on March 11, 2020. The pandemic and the measures to control negatively affected economic activity and business operations worldwide. This caused a higher level of uncertainty, which adversely affected financial markets and business confidence. Management has assessed that this has adversely affected the Company through a decline in share prices and cessation or reduction of dividend payments by some companies.

As operating restrictions in some industries and jurisdictions have been gradually lifted in 2021 and in 2022, Management has seen a recovery in asset prices, closer to pre-pandemic levels. This has resulted in significant fair value gains being recorded, as well as improved year-over-year dividends received for the year ended December 31, 2021. This trend has continued into Q1 2022 and the government's lifting off all COVID – 19 protocols under the Disaster Risk Management Act (DRMA) effective March 18, 2022, augurs well for further recovery of economic activity and company performance.

Notwithstanding the improvements noted above, Management recognises that market prices are subject to a higher degree of estimation and uncertainty. Consequently, there is an expectation that the volatility caused by the pandemic will continue in 2022.
