For the Nine Months ended September 30, 2025 Reported in JM\$

# CHIEF EXECUTIVE OFFICER'S COMMENTARY ON FINANCIAL RESULTS

For the Nine Months ended September 30, 2025

# **Economic and Business Environment**

In the second quarter of 2025, Jamaica's economy grew by 1.6% year-over-year, building on the 1.1% expansion recorded in the first quarter. This growth was driven by continued resilience in the Goods Producing Industries, which rose by 3.6%, led by Agriculture, Forestry & Fishing (9.2%), Construction (1.7%), and Manufacturing (1.5%), despite a 4.8% decline in Mining & Quarrying. The Services Industries expanded by 1.0%, supported by Accommodation & Food Service Activities (4.1%) and Financial & Insurance Activities (3.9%), though tempered by contractions in Electricity, Water Supply & Waste Management (-2.6%) and Education, Health & Other Services (-0.5%). On a quarter-over-quarter basis, the economy grew by 0.4%, reflecting a 2.3% increase in Goods Producing Industries, while Services Industries declined by 0.2%.

In August 2025, Jamaica's Consumer Price Index (CPI) rose by 0.3% compared to July, mainly driven by a 0.8% increase in the 'Food and Non-Alcoholic Beverages' category, with notable price hikes for items like watermelon, pineapple, and potatoes. The 'Recreation, Sports and Culture' division also saw a 0.9% rise due to higher textbook and stationery costs, while a 0.4% decline in the 'Housing, Water, Electricity, Gas and Other Fuels' division, attributed to lower electricity rates, helped offset the overall increase. Year-over-year inflation (August 2024 to August 2025) stood at 1.2%, influenced by significant changes in 'Restaurant and Accommodation Services' (+5.2%), 'Education' (+9.8%), and 'Information and Communication' (-5.8%).

In September 2025, the Bank of Jamaica (BOJ) maintained its policy interest rate at 5.75% per annum, signalling a steady monetary stance aimed at guiding inflation back within the target range of 4.0% to 6.0%. Although headline inflation fell to 1.2% in August—largely due to temporary factors such as lower agricultural prices, reduced electricity GCT, and fading transport fare effects—core inflation remained stable at 4.2%, indicating underlying demand pressures. The BOJ highlighted upside risks to inflation, including global trade tensions and potential supply chain disruptions. Jamaica's economy continues to grow, with GDP expansion estimated between 3.0% and 4.0% for the September quarter, supported by agriculture, tourism, and utilities. Labour market conditions remain tight, and medium-term growth is projected between 1.0% and 3.0%. External conditions, including rising U.S. inflation and falling commodity prices, are being closely monitored. The current account remains in surplus, reserves are strong, and the domestic financial system is stable.

(expressed in Jamaican dollars unless otherwise indicated)

The BOJ expects inflation to remain below target for the rest of 2025 but return to range by March 2026 and reaffirmed its commitment to data-driven policy adjustments.

The Jamaican dollar closed September 2025 at \$161.22 relative to \$157.38 in January 2025, depreciating against the U.S dollar by \$3.84 or 2.44% year to date. During the same period, the Bank of Jamaica (BOJ) actively intervened in the foreign exchange market to temper demand-side pressures, injecting a total of US\$560 million across 20 interventions as of September 18, 2025.

The JSE Main Market index rose by 6,857.64 points or 2.15% to 325,183.33 points at the end of September 2025. The JSE Junior Market index declined by 220.27 points or 6.04% closing at 3,428.85 points at the end of September 2025. Additionally, year to date, the JSE Main Market index fell by 3.16%, while the JSE Junior Market index fell by 8.20%.

# **Financial Highlights**

Mayberry Investments Limited (MIL) reported a net loss of \$142.4 million for the nine months ended September 30, 2025, compared to a loss of \$231.7 million for the corresponding period in 2024. This performance was primarily attributable to operating income remaining on similar levels to prior year, driven by fees and commissions, net foreign exchange gains and other income. This was complemented by a reduction in operating costs. Total operating expenses for the nine months ended September 30, 2025 decreased by 8% or \$126 million when compared to the comparative period in 2024 driven primarily by a reduction in staff costs, offset by increases in depreciation, amortization and other operating expenses. This resulted in a loss per share (LPS) of \$0.12 (2024: (LPS) \$0.19).

The Company reported a net loss of \$132.5 million for the period July to September 2025, compared to a profit of \$36.7 million for the corresponding period in the prior year. Total operating income decreased by 27.2% or \$155.6 million to \$417.3 million, when compared to \$572.8 million, for the corresponding quarter in 2024. Total operating expenses were higher by 2.6% or \$13.7 million for the three-month period driven by higher marketing and technology related costs. This resulted in a loss per share (LPS) of \$0.11 (2024: (EPS) \$0.03).

#### **Financial Performance**

#### **Net Interest Income**

For the nine months ended September 30, 2025, net interest income declined 27.7% or \$158.4 million to \$414.2 million, compared to net interest income of \$572.6 million for the corresponding period in 2024. This performance resulted from reduced earnings for reverse repurchase agreements, specialized and margin loans. However, this was partially offset by significant growth in interest from Government and Corporate securities which grew by 93%. Higher interest costs of \$199.5 million or 14.4% year over year reflect the growth in securities sold under repurchase agreements by 26% to fund operations.

For the period July to September 30, 2025, the Company reported net interest income of \$91.7 million compared to \$133.5 million for the corresponding period in 2024.

#### **Consulting Fees and Commissions**

The Company reported consulting fees & commission income of \$637 million for the nine months ended September 30, 2025, an increase of 11.6% or \$66.4 million over the comparative period primarily driven by key deals executed by the investment banking team.

For the three months July to September 30, 2025, the company reported consulting fees & commission income of \$265.9 million which fell short by 23.4% or \$81.1 million over the comparative period. The results for the comparative quarter included major private equity deals executed by the Brokerage Unit. Significant contributors during the quarter were:

- Portfolio management fees significantly grew by 129.3% or \$76 million over the corresponding quarter in 2024 due to growth in the portfolio,
- USD fixed income revenues increased by 483.4% or \$94.3 million on account of increased earnings from the Mayberry USD Corporate portfolio.

(expressed in Jamaican dollars unless otherwise indicated)

#### **Other Operating Income**

Other operating income for the nine months ended September 30, 2025, was higher by 28% or \$55.3 million when compared to the prior year. The July to September 30, 2025 period, however, reflected lower income by 35.4% or \$32.7 million partially driven by trading and fair value losses on investments when compared to the corresponding prior year period.

Notable variances for the quarter include:

- Net foreign exchange gains of \$39.8 million compared to gains of \$66.4 million for 2024 primarily due to a reduction in cambio gains by 35.3% resulting from reduced cambio volumes and spreads,
- Net trading losses on the disposal of securities totaled \$21.5 million compared to losses of \$1.5 million for the corresponding quarter in 2024,
- Other income grew by 133% or \$20 million to \$35.1 million.
- Dividend income increased by 145% or \$7 million to \$11.9 million.

#### **Operating Expenses**

Total operating expenses for the nine months ended September 30, 2025 reflected reductions in administrative and staff costs. For the period July to September 30, 2025, total operating expenses amounted to \$549.8 million, an increase of 2.6% or \$13.7 million over the corresponding period in 2024. For the period under review, operational administrative expenses were higher partially attributed to services procured to enhance MIL's technology capabilities.

#### **Assets and Liabilities**

Total assets as at September 30, 2025 increased by 13.9% to \$47.2 billion from the \$41.5 billion reported as at December 31, 2024. The \$5.8 billion increase was mainly attributable to a \$3 billion increase in loans and other receivables due to higher client margins. This is in addition to a higher cash balance, and due from related party balance of \$1.5 billion. This was offset by lower balances reported for reverse repurchase agreements and promissory notes.

Total liabilities increased by 17.6% or \$6.2 billion over December 2024. The growth in the balance sheet assets was partially funded by securities sold under repurchase agreements which were higher by 9% or \$861.8 million. This is in addition to accounts payable increasing by \$6.1 billion on account of client payables when compared to December 2024.

Mayberry Investments Limited's Capital Base remains strong with total shareholders' equity valued at \$6.1 billion. This resulted in a net book value per share of \$5.09 (Dec. 2024: \$5.41).

# **Capital Adequacy and Liquidity**

The Company's regulatory capital base continues to be robust and compliant with regulatory benchmarks. As at September 30, 2025, the capital to risk-weighted asset ratio of 15.6% exceeds the established minimum of 10% set by the Financial Services Commission (FSC). In addition, Tier one Capital is 99% of the Company's overall capital base and exceeds the regulatory minimum of 50% established by the FSC.
